Broad and basic law and ethics for doctors, nurses, and all occupations that care for patients. The premise: If clinicians do good practice of their profession, they will be ethical. That practice then will be far above the minimum standard of the law. The book enables the clinician to understand the law by knowing the ethic that produces the law. With that knowledge and a few basic examples of that principle, she can predict the law for herself and know that her practice is lawful. This is the only way clinicians can assure lawful practice, because the detail of law changes minute to minute while the courts, legislatures and agencies are open (every Monday to Friday, 52 weeks a year).
