The Global-Local Interface and Hybridity: Exploring Language and Identity

The chapters in this volume seek to bring hybrid language practices to the center of discussions about English as a global language. They demonstrate how local linguistic resources and practices are involved in the refashioning of identities in a variety of cross-cultural and geographical contexts, and illustrate hybridity as an enactment of resistance and creativity. Drawing on a variety of disciplines and ideological perspectives, the authors use contexts as diverse as social media, Bollywood films, workplaces and kindergartens to explore the ways in which English has become a part of localities and social relations in ways that are of significant sociolinguistic interest in understanding the dynamics of mobile cultures and transcultural flows.
