Taking Care of What We Have: Participatory Natural Resource Management on the Caribbean Coast of Nicaragua

Taking Care of What We Have: Participatory Natural Resource Management on the Caribbean Coast of Nicaragua

Together, rapid population growth, increased commercialization and exploitation of aquatic resources, deforestation and pollution, and encroachments on communally owned resources by national and transnational private interests are placing the world's coastal regions under enormous pressure. One example is the Pearl Lagoon estuary, the main basin on the Caribbean Coast of Nicaragua. This book provides detailed insight into the problems of the Pearl Lagoon and presents alternatives for more effective management of its natural resources. It documents a new approach to the study and future management of a complex resource system in a politically demanding environment.

The authors argue for earlier and greater involvement of community groups. They emphasize the need for persistence and the importance of interdisciplinary research in developing sustainable solutions to natural-resource-management problems.

Taking Care of What We Have will interest researchers, scholars, and students in natural resource management and development studies; donors, development organizations, and development practitioners working in the areas of natural resource management and participatory action research; and community leaders and NGOs in developing countries that work on natural-resource-management issues.

Jordan Sena:

People live in this new morning of lifestyle always aim to and must have the spare time or they will get wide range of stress from both day to day life and work. So , if we ask do people have spare time, we will say absolutely of course. People is human not just a robot. Then we ask again, what kind of activity do you have when the spare time coming to a person of course your answer will certainly unlimited right. Then do you try this one, reading publications. It can be your alternative in spending your spare time, the actual book you have read is usually Taking Care of What We Have: Participatory Natural Resource Management on the Caribbean Coast of Nicaragua.

Nancy Brown:

As a university student exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some reserve, they are complained. Just minor students that has reading's heart and soul or real their interest. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading significantly. Any students feel that reading through is not important,

boring in addition to can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Taking Care of What We Have: Participatory Natural Resource Management on the Caribbean Coast of Nicaragua can make you really feel more interested to read.
