Biofilms in the Food Environment (Institute of Food Technologists Series) Anthony L. Pometto III, Ali Demirci

In nature, microorganisms are generally found attached to surfaces as biofilms such as dust, insects, plants, animals and rocks, rather than suspended in solution. Once a biofilm is developed, other microorganisms are free to attach and benefit from this microbial community. The food industry, which has a rich supply of nutrients, solid surfaces, and raw materials constantly entering and moving through the facility, is an ideal environment for biofilm development, which can potentially protect food pathogens from sanitizers and result in the spread of foodborne illness.

Biofilms in the Food Environment is designed to provide researchers in academia, federal research labs, and industry with an understanding of the impact, control, and hurdles of biofilms in the food environment. Key to biofilm control is an understanding of its development. The goal of this 2nd edition is to expand and complement the topics presented in the original book. Readers will find:

- The first comprehensive review of biofilm development by *Campylobacter jejuni*
- An up-date on the resistance of *Listeria monocytogenes* to sanitizing agents, which continues to be a major concern to the food industry
- An account of biofilms associated with various food groups such as dairy, meat, vegetables and fruit is of global concern
- A description of two novel methods to control biofilms in the food environment: bio-nanoparticle technology and bacteriophage

Biofilms are not always a problem: sometimes they even desirable. In the human gut they are essential to our survival and provide access to some key nutrients from the food we consume. The authors provide up-date information on the use of biofilms for the production of value-added products via microbial fermentations.

Biofilms cannot be ignored when addressing a foodborne outbreak. All the authors for each chapter are experts in their field of research. The Editors' hope is that this second edition will provide the bases and understanding for much needed future research in the critical area of Biofilm in Food Environment.

From reader reviews:

James Ellis:

Do you have favorite book? In case you have, what is your favorite's book? E-book is very important thing for us to understand everything in the world. Each guide has different aim or maybe goal; it means that reserve has different type. Some people truly feel enjoy to spend their time to read a book. They can be reading whatever they get because their hobby is definitely reading a book. Think about the person who don't like looking at a book? Sometime, person feel need book whenever they found difficult problem or exercise. Well, probably you should have this Biofilms in the Food Environment (Institute of Food Technologists Series).

Susan Albro:

This book untitled Biofilms in the Food Environment (Institute of Food Technologists Series) to be one of several books that best seller in this year, this is because when you read this guide you can get a lot of benefit into it. You will easily to buy this specific book in the book store or you can order it by way of online. The publisher on this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Smart phone. So there is no reason to you to past this publication from your list.

James Edgar:

That publication can make you to feel relax. This particular book Biofilms in the Food Environment (Institute of Food Technologists Series) was colorful and of course has pictures on there. As we know that book Biofilms in the Food Environment (Institute of Food Technologists Series) has many kinds or type. Start from kids until teens. For example Naruto or Investigator Conan you can read and believe that you are the character on there. Therefore , not at all of book are usually make you bored, any it can make you feel happy, fun and relax. Try to choose the best book in your case and try to like reading which.

Deon Henderson:

A lot of people said that they feel bored stiff when they reading a book. They are directly felt this when they get a half regions of the book. You can choose the actual book Biofilms in the Food Environment (Institute of Food Technologists Series) to make your current reading is interesting. Your personal skill of reading proficiency is developing when you such as reading. Try to choose easy book to make you enjoy you just read it and mingle the idea about book and reading through especially. It is to be first opinion for you to like to open up a book and read it. Beside that the reserve Biofilms in the Food Environment (Institute of Food Technologists Series) can to be a newly purchased friend when you're feel alone and confuse in doing what must you're doing of the time.
