Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition Mica R. Endsley

The barrage of data overload is threatening the ability of people to effectively operate in a wide range of systems including aircraft cockpits and ground control stations, military command and control centers, intelligence operations, emergency management, medical systems, air traffic control centers, automobiles, financial and business management systems, space exploration, and power and process control rooms. All of these systems need user interfaces that allow people to effectively manage the information available to gain a high level of understanding of what is currently happening and projections on what will happen next. They need systems designed to support situation awareness.

Addressing the information gap between the plethora of disorganized, low-level data and what decision makers really need to know, **Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition** provides a successful, systematic methodology and 50 design principles for engineers and designers seeking to improve the situation awareness of their systems' users based on leading research on a wide range of relevant issues.

See what's new in the Second Edition:

- Significantly expanded and updated examples throughout to a wider range of domains New Chapters: *Situation Awareness Oriented Training* and *Supporting SA in Unmanned and Remotely Operated Vehicles*
- Updated research findings and expanded discussion of the SA design principles and guidelines to cover new areas of development

Mica R. Endsley is a pioneer and world leader in the study and application of situation awareness in advanced systems. Debra G. Jones work is focused on designing large-scale and complex systems to support situation awareness and dynamic decision making. Completely revised and updated, liberally illustrated with actual design examples, this second edition demonstrates how people acquire and interpret information and examines the factors that undermine this process. Endsley and Jones distill their expertise and translate current research into usable, applicable methods and guidelines.

From reader reviews:

John Carter:

The book Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition can give more knowledge and also the precise product information about everything you want. Why must we leave a good thing like a book Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition? A few of you have a different opinion about e-book. But one aim this book can give many info for us. It is absolutely correct. Right now, try to closer with the book. Knowledge or information that you take for that, you are able to give for each other; you are able to share all of these. Book Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition has simple shape but you know: it has great and massive function for you. You can appearance the enormous world by open and read a reserve. So it is very wonderful.

Alberto Meyer:

Nowadays reading books become more than want or need but also work as a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge even the information inside the book that will improve your knowledge and information. The data you get based on what kind of publication you read, if you want send more knowledge just go with education and learning books but if you want feel happy read one using theme for entertaining like comic or novel. Often the Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition is kind of book which is giving the reader capricious experience.

Patricia Meyer:

Playing with family in the park, coming to see the sea world or hanging out with friends is thing that usually you may have done when you have spare time, and then why you don't try factor that really opposite from that. A single activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition, you may enjoy both. It is excellent combination right, you still want to miss it? What kind of hang type is it? Oh occur its mind hangout folks. What? Still don't get it, oh come on its identified as reading friends.

Kirk Thomas:

Reading a book to be new life style in this year; every people loves to read a book. When you read a book you can get a lots of benefit. When you read books, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what types of book that you have read. If you wish to get information about your analysis, you can read education books, but if you want to entertain yourself you can read a fiction books, these us novel, comics, as well as soon. The Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition provide you with new experience in

studying a book.
