Advanced Biology Study Notes - Photosynthesis - For teachers & students

When I was a newly qualified teacher, photosynthesis scared me, so I wrote this book for teachers & students struggling with this topic at advanced level (by "advanced level", I'm taking pre-university, 16-18 year old students). While this book will help newly qualified teachers tackling the subject for the first time, it will also provide a structured set of notes for advanced students to work with as they study this topic.

Contents of the book

1. Introduction – energy
 - 1.1. Animals hunt their food, plants cannot – they have to make it.
 - 1.2. Metabolic reactions
 - 1.3 Adenosine TriPhosphate (ATP)
2. Plant Adaptations to Photosynthesis
 - 2.1. The leaf as a photosynthetic organ
 - 2.1.1. Palisade cells
 - 2.1.2. Chloroplasts
 - 2.1.3. The Site of light-dependent and light-independent reactions
 - 2.2. Pigments involved in photosynthesis
 - 2.2.1. Absorption v Action spectrums of photosynthetic pigments
3. The two main reactions in Photosynthesis
 - 3.1. Light-Dependent Reactions
 - 3.1.1. Summary of cyclic v non-cyclic
 - 3.2. Light-Independent Reactions
 - 3.2.1. Calvin's Lollipop experiment
 - 3.2.2. The Calvin Cycle
 - 3.2.3. Fate of TP
 - 3.3. Photosynthesis summary: Linking the light reaction to the light-independent reaction.
4. Limiting factors
 - 4.1. Light
 - 4.2. Carbon dioxide
 - 4.3. Temperature
 - 4.4. Chlorophyll
 - 4.5. Water
5. Practical Work
 - 5.1. Measuring the effect of light on the rate of photosynthesis
 - 5.1.1. Extending this practical

- 5.2. Carbon dioxide
- 5.3. Temperature
- 5.4. Compensation point
- 5.4.1. Preparing hydrogencarbonate indicator stock solution:
- 5.5. Gas analysis
- 5.5.1. Where to go next?
- 6. Photosynthesis Examination & Student Handouts

What else is included?

The book includes a download link to all of the images found in this book, as well as a practice examination and full mark scheme. The image downloads can be used in your own worksheets / teaching aids, while the exam and mark scheme can be used to test your students. This comes as a PDF for easy printing as well as a Word document in case you want to edit it.

From reader reviews:

John White:

Information is provisions for those to get better life, information presently can get by anyone at everywhere. The information can be a expertise or any news even restricted. What people must be consider when those information which is within the former life are difficult to be find than now is taking seriously which one is suitable to believe or which one the actual resource are convinced. If you receive the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All those possibilities will not happen within you if you take Photosynthesis - Advanced Biology Study Notes: For teachers & students (includes a mock exam) as your daily resource information.

Jamie Sparks:

The reserve untitled Photosynthesis - Advanced Biology Study Notes: For teachers & students (includes a mock exam) is the publication that recommended to you to study. You can see the quality of the publication content that will be shown to a person. The language that author use to explained their way of doing something is easily to understand. The article author was did a lot of analysis when write the book, so the information that they share to you is absolutely accurate. You also could get the e-book of Photosynthesis - Advanced Biology Study Notes: For teachers & students (includes a mock exam) from the publisher to make you a lot more enjoy free time.

Edward Chavez:

Reading a book being new life style in this year; every people loves to go through a book. When you study a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what forms of book that you have read. In order to get information about your study, you can read education books, but if you want to entertain yourself read a fiction books, such us novel, comics, as well as soon. The Photosynthesis - Advanced Biology Study Notes: For teachers & students (includes a mock exam) provide you with a new experience in examining a book.

Arthur Fabry:

As a scholar exactly feel bored to help reading. If their teacher questioned them to go to the library in order to make summary for some publication, they are complained. Just little students that has reading's soul or real their pastime. They just do what the trainer want, like asked to the library. They go to there but nothing reading really. Any students feel that studying is not important, boring and also can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Photosynthesis - Advanced Biology Study Notes: For teachers & students (includes a mock exam) can make you sense more interested to read.
