**Solar and Geothermal Energy challenge of expensive costs and technology (Chinese Edition) John Tabak**

So far, China has become a large producer of solar cell, and solar energy has been included in the development planning as a strategic measure that guarantees energy security. But the reality is that China is only a small consumer of solar energy due to its characteristics: dispersedness, instability, low transfer efficiency, and high cost of production. The exploitation of geothermal energy also has the same problems. Therefore, understanding the potential and defects of these energies is of crucial significance to the appropriate exploitation of them in the future.
