Software Process Technology: 9th International Workshop, EWSPT 2003, Helsinki, Finland, September 1-2, 2003, Proceedings (Lecture Notes in Computer Science)

During the last two decades we have seen tremendous developments within software engineering research and practice. The ever increasing complexity of software systems and the revolutionary development in the Internet have led to many interesting challenges and opportunities for new developments in Software Process Technology. Started in 1990, the primary goal of the European Workshops on Software Process Technology is to achieve better understanding of the state-of-the-art on all issues related to software process technology, including (but not limited to): process modeling languages, computer-supported process description, analysis, reuse, refinement and enactment, process monitoring, measurement, management, improvement and evolution, process enactment engines, tools, and environments. Besides the technical viewpoint, the workshops have also taken into account human and social dimensions in software process enactment.

The 9th European Workshop on Software Process Technology (EWSPT-9) provided an international forum for researchers and practitioners from academia and industry to discuss a wider range of topics in the area of software process technology, and to jointly formulate an agenda for future research in this field.

The Program Committee met in Portland, Oregon, USA during ICSE 2003, to select the papers for inclusion in the proceedings. Twelve papers (eleven research papers and one position paper) were selected out of 25 submissions from 12 countries (Australia, Austria, Brazil, China, Finland, France, Germany, Mexico, Norway, Spain, UK, USA). All submissions were reviewed by three members of the Program Committee. Papers were selected based on originality, quality, soundness and relevance to the workshop. In addition, the program included an invited talk by Volker Gruhn (University of Leipzig, Germany). Credit for the quality of the proceedings goes to all authors of the papers. I would like to thank the members of the Program Committee (Jean-Claude Driame, Jacky Estublier, Carlo Ghezzi, Carlo Montangero, Leon Osterweil, Dewayne Perry, and Brian Warboys) for providing timely and significant reviews, and for their substantial effort in making EWSPT-9 a successful workshop. This year the workshop was held in conjunction with the joint European Software Engineering Conference and ACM SIGSOFT Symposium on the Foundations of Software Engineering. I would like to acknowledge the General Chair, Jukka Paakki, and the members of the Organizing Committee for their assistance during the organization of EWSPT-9 as a co-located workshop. I would also like to acknowledge the prompt and professional support from Springer-Verlag, who published these proceedings in printed and electronic volumes as part of the Lecture Notes in Computer Science series.

From reader reviews:

Jennifer Carter:

The book Software Process Technology: 9th International Workshop, EWSPT 2003, Helsinki, Finland, September 1-2, 2003, Proceedings (Lecture Notes in Computer Science) give you a sense of feeling enjoy for your spare time. You can use to make your capable considerably more increase. Book can to become your best friend when you getting anxiety or having big problem with the subject. If you can make looking at a book Software Process Technology: 9th International Workshop, EWSPT 2003, Helsinki, Finland, September 1-2, 2003, Proceedings (Lecture Notes in Computer Science) being your habit, you can get far more advantages, like add your current capable, increase your knowledge about many or all subjects. It is possible to know everything if you like available and read a book Software Process Technology: 9th International Workshop, EWSPT 2003, Helsinki, Finland, September 1-2, 2003, Proceedings (Lecture Notes in Computer Science). Kinds of book are a lot of. It means that, science guide or encyclopedia or other folks. So , how do you think about this guide?

Carol Hughes:

As people who live in the actual modest era should be update about what going on or data even knowledge to make these people keep up with the era which can be always change and progress. Some of you maybe will update themselves by looking at books. It is a good choice to suit your needs but the problems coming to an individual is you don't know which you should start with. This Software Process Technology: 9th International Workshop, EWSPT 2003, Helsinki, Finland, September 1-2, 2003, Proceedings (Lecture Notes in Computer Science) is our recommendation so you keep up with the world. Why, as this book serves what you want and wish in this era.

Edward Johnson:

This Software Process Technology: 9th International Workshop, EWSPT 2003, Helsinki, Finland, September 1-2, 2003, Proceedings (Lecture Notes in Computer Science) tend to be reliable for you who want to be a successful person, why. The main reason of this Software Process Technology: 9th International Workshop, EWSPT 2003, Helsinki, Finland, September 1-2, 2003, Proceedings (Lecture Notes in Computer Science) can be among the great books you must have is actually giving you more than just simple examining food but feed anyone with information that possibly will shock your previous knowledge. This book will be handy, you can bring it everywhere you go and whenever your conditions both in e-book and printed types. Beside that this Software Process Technology: 9th International Workshop, EWSPT 2003, Helsinki, Finland, September 1-2, 2003, Proceedings (Lecture Notes in Computer Science) giving you an enormous of experience including rich vocabulary, giving you tryout of critical thinking that we know it useful in your day exercise. So , let's have it and enjoy reading.

Jerry Jackman:

The reason? Because this Software Process Technology: 9th International Workshop, EWSPT 2003, Helsinki, Finland, September 1-2, 2003, Proceedings (Lecture Notes in Computer Science) is an unordinary book that the inside of the book waiting for you to snap it but latter it will shock you with the secret that inside. Reading this book alongside it was fantastic author who all write the book in such remarkable way makes the content within easier to understand, entertaining approach but still convey the meaning thoroughly. So , it is good for you for not hesitating having this any longer or you going to regret it. This amazing book will give you a lot of advantages than the other book possess such as help improving your expertise and your critical thinking method. So , still want to postpone having that book? If I have been you I will go to the book store hurriedly.
