Ethics: Contemporary challenges in health and social care

Ethics: Contemporary challenges in health and social care

While ethics has been addressed in the health care literature, relatively little attention has been paid to the subject in the field of social care. This book redresses the balance by examining theory, research, policy and practice in both fields. The analysis is set within the context of contemporary challenges facing health and social care, not only in Britain but internationally. Contributors from the UK, US and Australia consider ethical issues in health and social care research and governance; interprofessional and user perspectives; [vbTab]ethics in relation to human rights, the law, finance, management and provision; key issues of relevance to vulnerable groups such as children and young people, those with complex disabilities, older people and those with mental health problems and lifecourse issues - ethical perspectives on a range of challenging areas from new technologies of reproduction to euthanasia. This book is intended for academics, students and researchers in health and social care who need an up-to-date analysis of contemporary issues and debates. It will also be useful to practitioners in the public, private and voluntary sectors, including social workers, community workers, those working in the fields of disability and mental health and with older people.
