A large body of literature discusses the preplanned destruction of the Twin Towers and of WTC Nr.7, while mainstream media have extensively reported about the reluctance of the Bush administration to investigate 9/11, the destruction of criminal evidence from Ground Zero and other facts suggesting a government cover-up. But they all stopped short of connecting the dots. Four features distinguish Davidsson's book from the rest. He provides: - The definite (or ultimate) demonstration that there is no evidence of Muslim hijackers - Evidence that at least two of the four aircraft were still airborne after the alleged crash time - The most exacting and comprehensive analysis of the phone calls said to have been made from the aircraft - The presentation of a theory regarding the nature of the phone calls Here, readers are presented with numerous examples where U.S. authorities suppressed crucial information, appear to have forged and planted evidence, attempted to intimidate witnesses and publicized deceptive and mendacious reports. Such conduct would not have taken place if U.S. leaders had been acting in good faith, felt compassion towards the victims of the mass-murder and considered themselves accountable to the American people. This was an unprecedented propaganda coup. While this book concentrates on a relatively narrow aspect of 9/11, there is a need to address a far larger picture, including the facility with which entire nations were deluded within hours to believe in what can be designated as a surreal legend. For the official 9/11 narrative — had it not been systematically and intensively promoted by all major media — would have been good stuff for a book on religious miracles.
