Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering)

Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering)

Many factors are relevant in making the proper choice of food packaging material, including those related to shelf life and biodegradability. To meet these demands, new processing and preservation techniques have arisen, most notably modified atmosphere packaging (MAP) and active packaging (AP). **Modified Atmosphere and Active Packaging Technologies** presents an overview of the current status of MAP and AP, exploring techniques, methodologies, applications, and relevant legislation.

For clarity and easy reference, the book is divided into seven convenient sections:

- **Principles, Materials, Gases, and Machinery for MAP** provides a basic overview of the topic and defines modified atmosphere, controlled atmosphere, and active packaging.
- **Safety and Quality Control of MAP Products** examines the effect of MAP on various foods and discusses governmental control mechanisms to ensure food safety.
- **Applications of MAP in Foods of Animal Origin** explores how MAP can be used in fish, meat, poultry and dairy products.
- **Applications of MAP in Foods of Plant Origin** discusses MAP for cereals, minimally processed vegetables, fruits, and bakery products.
- **Other Applications of MAP** reviews MAP's use in ready-to-eat (RTE) foods and coffee, tea, beer, and snack foods.
- **Active Packaging and its New Trends** examines issues related to nanotechnology and bioactive packaging.
- **Consumer Behavior/Sensory Analysis and Legislation** covers legislation in the European Union, the United States, and Canada and presents conclusions and new issues on the horizon.

From the very basics (films, gases, techniques, and applications) up to the latest advances (nanotechnology and bioactive compounds), this book covers nearly all issues related to MAP and AP, providing an essential reference for food scientists and engineers, agriculturalists, chemists, and all those on the cutting edge of food packaging.

From reader reviews:

Peggy Mitchum:

Precisely why? Because this Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) is an unordinary book that the inside of the book waiting for you to snap the idea but latter it will jolt you with the secret the item inside. Reading this book alongside it was fantastic author who all write the book in such wonderful way makes the content interior easier to understand, entertaining means but still convey the meaning thoroughly. So , it is good for you for not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of rewards than the other book get such as help improving your expertise and your critical thinking approach. So , still want to hold off having that book? If I had been you I will go to the publication store hurriedly.

Guadalupe Ramsey:

Reading a book being new life style in this year; every people loves to study a book. When you learn a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you would like get information about your review, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these us novel, comics, along with soon. The Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) provide you with a new experience in reading a book.

Chris Wolf:

Do you like reading a book? Confuse to looking for your favorite book? Or your book had been rare? Why so many problem for the book? But any kind of people feel that they enjoy for reading. Some people likes reading, not only science book but in addition novel and Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) or maybe others sources were given expertise for you. After you know how the truly great a book, you feel wish to read more and more. Science guide was created for teacher or students especially. Those textbooks are helping them to put their knowledge. In different case, beside science reserve, any other book likes Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) to make your spare time considerably more colorful. Many types of book like this.

Earnest Koontz:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from a book. Book is published or printed or outlined from each source in which filled update of news. Within this modern era like today, many ways to get information are available for a person. From media social like newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or

just searching for the Modified Atmosphere and Active Packaging Technologies (Contemporary Food Engineering) when you needed it?
