Advances in Networked Enterprises: Virtual Organizations, Balanced Automation, and Systems Integration (IFIP Advances in Information and Communication Technology) Luis M. Camarinha-Matos, Hamideh Afsarmanesh, Heinz-H. Erbe

New market trends and the emergence of the so-called Internet-based 'new economy' are leading companies to new forms of organization, mostly relying on privileged cooperation links. Nowadays, most manufacturing processes are not carried out by single enterprises. Rather, organizations feel the need to focus on their core competencies and join efforts with others, in order to fulfill the requirements of new products/services demanded by the global market. In a cooperative networked organization, every enterprise is just a node that adds some value to the process; namely, a step in the manufacturing/supply chain.

Furthermore, manufacturing companies increasingly encompass what has typically been regarded as the domain of the service sector. They try to establish long-term relationships with their customers, in order to service their needs around a manufactured product. For these reasons, the area of virtual organizations and industrial virtual enterprises is attracting growing interest in terms of research and development, and implementation approaches for new business practices.

The main emphasis of this book is on virtual enterprises and other networked organizations, with special focus on: supporting infrastructures and management of distributed business processes, intelligent multi-agent systems, knowledge management, human interfaces, and socio-economical aspects. Also included in the book are related topics on automation, both in manufacturing and transportation. Special attention is assigned to the fact that advances in information technology and new organizational paradigms will be used not only to induce new economic structures, but also to help a sustainable migration of existing systems towards the new economy. When electronic business initiatives attract such widespread attention, it is important to conciliate the 'old' and 'new' economies under a balanced perspective.

Advances in Networked Enterprises is essential reading for researchers and engineering students in production engineering, computer science, electrical engineering, mechanical engineering, industrial sociology, and transportation, as well as for engineers and practitioners in manufacturing and transportation systems organization and planning.

From reader reviews:

Nikki Jones:

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite book and reading a reserve. Beside you can solve your condition; you can add your knowledge by the reserve entitled Advances in Networked Enterprises: Virtual Organizations, Balanced Automation, and Systems Integration (IFIP Advances in Information and Communication Technology). Try to face the book Advances in Networked Enterprises: Virtual Organizations, Balanced Automation, and Systems Integration (IFIP Advances in Information and Communication Technology) as your good friend. It means that it can be your friend when you really feel alone and beside associated with course make you smarter than ever. Yeah, it is very fortunated to suit your needs. The book makes you a lot more confidence because you can know every little thing by the book. So , we need to make new experience in addition to knowledge with this book.

Lela Koehn:

Do you among people who can't read satisfying if the sentence chained from the straightway, hold on guys this aren't like that. This Advances in Networked Enterprises: Virtual Organizations, Balanced Automation, and Systems Integration (IFIP Advances in Information and Communication Technology) book is readable by you who hate the perfect word style. You will find the data here are arrange for enjoyable looking at experience without leaving also decrease the knowledge that want to give to you. The writer regarding Advances in Networked Enterprises: Virtual Organizations, Balanced Automation, and Systems Integration (IFIP Advances in Information and Communication Technology) content conveys objective easily to understand by many people. The printed and e-book are not different in the information but it just different available as it. So , do you nevertheless thinking Advances in Networked Enterprises: Virtual Organizations, Balanced Automation, and Systems Integration (IFIP Advances in Information and Communication Technology) is not loveable to be your top record reading book?

Jean Gadson:

Information is provisions for people to get better life, information presently can get by anyone at everywhere. The information can be a information or any news even restricted. What people must be consider while those information which is from the former life are challenging to be find than now is taking seriously which one is acceptable to believe or which one the resource are convinced. If you find the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen with you if you take Advances in Networked Enterprises: Virtual Organizations, Balanced Automation, and Systems Integration (IFIP Advances in Information and Communication Technology) as your daily resource information.

John Coffin:

What is your hobby? Have you heard that will question when you got scholars? We believe that that question was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. So you know that little person similar to reading or as studying become their hobby. You should know that reading is very important along with book as to be the point. Book is important thing to incorporate you knowledge, except your current teacher or lecturer. You will find good news or update about something by book. Different categories of books that can you take to be your object. One of them is this Advances in Networked Enterprises: Virtual Organizations, Balanced Automation, and Systems Integration (IFIP Advances in Information and Communication Technology).
