Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G

Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G

A highly practical guide rooted in theory to include the necessary background for taking the reader through the planning, implementation and management stages for each type of cellular network.

Present day cellular networks are a mixture of the technologies like GSM, EGPRS and WCDMA. They even contain features of the technologies that will lead us to the fourth generation networks. Designing and optimising these complex networks requires much deeper understanding. *Advanced Cellular Network Planning and Optimisation* presents radio, transmission and core network planning and optimisation aspects for GSM, EGPRS and WCDMA networks with focus on practical aspects of the field. Experts from each of the domains have brought their experiences under one book making it an essential read for design practitioners, experts, scientists and students working in the cellular industry.

Key Highlights

- Focus on radio, transmission and core network planning and optimisation
- Covers GSM, EGPRS, WCDMA network planning & optimisation
- Gives an introduction to the networks/technologies beyond WCDMA, and explores its current status and future potential
- Examines the full range of potential scenarios and problems faced by those who design cellular networks and provides advice and solutions all backed up with real-world examples

This text will serve as a handbook to anyone engaged in the design, deployment, performance and business of Cellular Networks.

"Efficient planning and optimization of mobile networks are key to guarantee superior quality of service and user experience. They also form the essential foundation for the success of future technology development, making this book a valuable read on the road towards 4G."

—Tero Ojanperä, Chief Technology Officer, Nokia Networks

From reader reviews:

Richard Glass:

The book Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G make one feel enjoy for your spare time. You may use to make your capable more increase. Book can being your best friend when you getting tension or having big problem together with your subject. If you can make looking at a book Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G to become your habit, you can get a lot more advantages, like add your own capable, increase your knowledge about a few or all subjects. It is possible to know everything if you like available and read a book Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G. Kinds of book are several. It means that, science reserve or encyclopedia or other individuals. So , how do you think about this publication?

Armando Rodgers:

This Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G book is not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book will be information inside this e-book incredible fresh, you will get data which is getting deeper you read a lot of information you will get. This specific Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G without we realize teach the one who reading through it become critical in considering and analyzing. Don't end up being worry Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G can bring once you are and not make your case space or bookshelves' become full because you can have it within your lovely laptop even mobile phone. This Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G having good arrangement in word and layout, so you will not experience uninterested in reading.

Brian Freeman:

Typically the book Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G has a lot of knowledge on it. So when you read this book you can get a lot of benefit. The book was compiled by the very famous author. Mcdougal makes some research just before write this book. This kind of book very easy to read you may get the point easily after scanning this book.

Clarine Davidson:

A lot of e-book has printed but it differs from the others. You can get it by web on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever through searching from it. It is called of book Advanced Cellular Network Planning and Optimisation: 2G/2.5G/3G...Evolution to 4G. You can add your knowledge by it. Without leaving behind the printed book, it may add your knowledge and make you actually happier to read. It is most significant that, you must aware about reserve. It can bring you from one place to other place.
