Brain Rules (Updated and Expanded): 12 Principles for Surviving and Thriving at Work, Home, and School John Medina

Most of us have no idea what's really going on inside our heads. Yet brain scientists have uncovered details every business leader, parent, and teacher should know—like the need for physical activity to get your brain working its best.

How do we learn? What exactly do sleep and stress do to our brains? Why is multi-tasking a myth? Why is it so easy to forget—and so important to repeat new knowledge? Is it true that men and women have different brains?

In *Brain Rules*, Dr. John Medina, a molecular biologist, shares his lifelong interest in how the brain sciences might influence the way we teach our children and the way we work. In each chapter, he describes a brain rule—what scientists know for sure about how our brains work—and then offers transformative ideas for our daily lives.

Medina's fascinating stories and infectious sense of humor breathe life into brain science. You'll learn why Michael Jordan was no good at baseball. You'll peer over a surgeon's shoulder as he proves that most of us have a Jennifer Aniston neuron. You'll meet a boy who has an amazing memory for music but can't tie his own shoes.

You will discover how:

Every brain is wired differently

Exercise improves cognition

We are designed to never stop learning and exploring

Memories are volatile

Sleep is powerfully linked with the ability to learn

Vision trumps all of the other senses

Stress changes the way we learn

In the end, you'll understand how your brain really works—and how to get the most out of it.

Clarence Delapaz:

Reading a book to be new life style in this calendar year; every people loves to study a book. When you examine a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your study, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, along with soon. The Brain Rules (Updated and Expanded): 12 Principles for Surviving and Thriving at Work, Home, and School offer you a new experience in reading through a book.

Brenda Villa:

As a college student exactly feel bored for you to reading. If their teacher expected them to go to the library or even make summary for some reserve, they are complained. Just little students that has reading's heart or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to right now there but nothing reading very seriously. Any students feel that reading through is not important,

boring as well as can't see colorful photos on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Brain Rules (Updated and Expanded): 12 Principles for Surviving and Thriving at Work, Home, and School can make you feel more interested to read.
