Decision Making in Health and Medicine: Integrating Evidence and Values M. G. Myriam Hunink, Milton C. Weinstein, Eve Wittenberg, Michael F. Drummond, Joseph S. Pliskin, John B. Wong, Paul P. Glasziou

Decision making in health care involves consideration of a complex set of diagnostic, therapeutic and prognostic uncertainties. Medical therapies have side effects, surgical interventions may lead to complications, and diagnostic tests can produce misleading results. Furthermore, patient values and service costs must be considered. Decisions in clinical and health policy require careful weighing of risks and benefits and are commonly a trade-off of competing objectives: maximizing quality of life vs maximizing life expectancy vs minimizing the resources required. This text takes a proactive, systematic and rational approach to medical decision making. It covers decision trees, Bayesian revision, receiver operating characteristic curves, and cost-effectiveness analysis; as well as advanced topics such as Markov models, microsimulation, probabilistic sensitivity analysis and value of information analysis. It provides an essential resource for trainees and researchers involved in medical decision modelling, evidence-based medicine, clinical epidemiology, comparative effectiveness, public health, health economics, and health technology assessment.

From reader reviews:

Patricia Smith:

What do you about book? It is not important to you? Or just adding material when you want something to explain what your own problem? How about your free time? Or are you busy individual? If you don't have spare time to do others business, it is make you feel bored faster. And you have spare time? What did you do? Every person has many questions above. They should answer that question because just their can do that. It said that about reserve. Book is familiar in each person. Yes, it is correct. Because start from on pre-school until university need that Decision Making in Health and Medicine: Integrating Evidence and Values to read.

Tom Moore:

Why? Because this Decision Making in Health and Medicine: Integrating Evidence and Values is an unordinary book that the inside of the book waiting for you to snap it but latter it will jolt you with the secret the idea inside. Reading this book adjacent to it was fantastic author who also write the book in such amazing way makes the content on the inside easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you for not hesitating having this any longer or you going to regret it. This amazing book will give you a lot of advantages than the other book have got such as help improving your skill and your critical thinking technique. So , still want to postpone having that book? If I were you I will go to the publication store hurriedly.

Pablo Cowart:

Are you kind of stressful person, only have 10 as well as 15 minute in your moment to upgrading your mind talent or thinking skill also analytical thinking? Then you are having problem with the book as compared to can satisfy your small amount of time to read it because all of this time you only find book that need more time to be examine. Decision Making in Health and Medicine: Integrating Evidence and Values can be your answer given it can be read by you actually who have those short time problems.

Carl Guerra:

As a college student exactly feel bored for you to reading. If their teacher requested them to go to the library or even make summary for some reserve, they are complained. Just minor students that has reading's heart and soul or real their passion. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that looking at is not important, boring along with can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Decision Making in Health and Medicine: Integrating Evidence and Values can make you feel more interested to read.
