Geoffrey Miller

The Mating Mind: How Sexual Choice Shaped the Evolution of Human Nature Geoffrey Miller

At once a pioneering study of evolution and an accessible and lively reading experience, **The Mating Mind** marks the arrival of a prescient and provocative new science writer. Psychologist Geoffrey Miller offers the most convincing—and radical—explanation for how and why the human mind evolved.

Consciousness, morality, creativity, language, and art: these are the traits that make us human. Scientists have traditionally explained these qualities as merely a side effect of surplus brain size, but Miller argues that they were sexual attractors, not side effects. He bases his argument on Darwin's theory of *sexual* selection, which until now has played second fiddle to Darwin's theory of *natural* selection, and draws on ideas and research from a wide range of fields, including psychology, economics, history, and pop culture. Witty, powerfully argued, and continually thought-provoking, **The Mating Mind** is a landmark in our understanding of our own species.
