Physical and Chemical Aspects of Combustion: A Tribute to Irvin Glassman (Food and Nutrition in History and Anthropology)

Physical and Chemical Aspects of Combustion: A Tribute to Irvin Glassman (Food and Nutrition in History and Anthropology)

This book contains a collection of papers prepared by leading experts on selected areas of particular importance to researchers in combustion science. The editors have gathered writings on fundamental physical and chemical aspects of combustion, including combustion chemistry, soot formation, and condensed phase and turbulent combustion intended to be a source of current understanding on the topics covered. The materials were originally presented as part of a Colloquium on Combustion held in honor of Professor Irvin Glassman.
